# Greeb

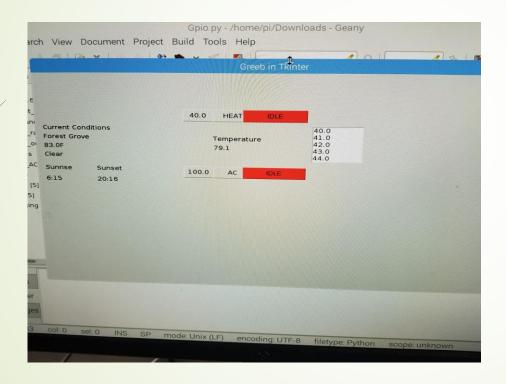

Home automation with Raspberry Pi and Python3

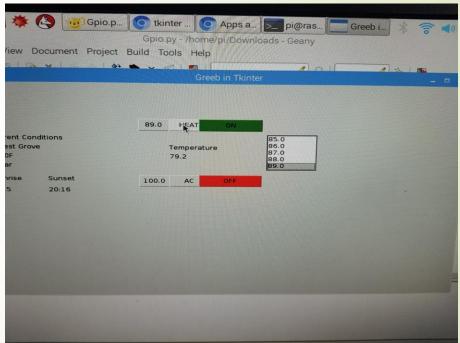

## Basic hardware setup

### Minimal interface

#### Current features

- Heating and Air condition controls with hardware connection to HVAC system
- Current weather conditions through Weather Underground API
- Ambient temperature with DS18B20 sensor

#### Future additions

- Environmental learning algorithm based on heating/cooling properties of the target environment
- Automated heating/cooling using outside weather conditions (for systems with external air ability)
- WeMo device integration (lighting, etc.)
- API for remote access (RESTful, Android, iOS)
- Irrigation controls

#### Contact and Resources

- Greeb is currently available on Github: <a href="https://github.com/ChrisGatehouse/Greeb">https://github.com/ChrisGatehouse/Greeb</a>
- A quick demo of it running is here: <a href="https://youtu.be/FIS6iQvN7s">https://youtu.be/FIS6iQvN7s</a>
- Email: <u>cgate2@pdx.edu</u>
